THE
TAIGER
STRIPES
TAIGER
10 Principles TAIGERs live by

TAIGERs are a different breed.

Every TAIGER is unique. They come from all walks of life and all sorts of companies.

Who are TAIGERs?

Stripe

ST-RI-PE NOUN [C] UK /STRAIP/ US /STRAIP/

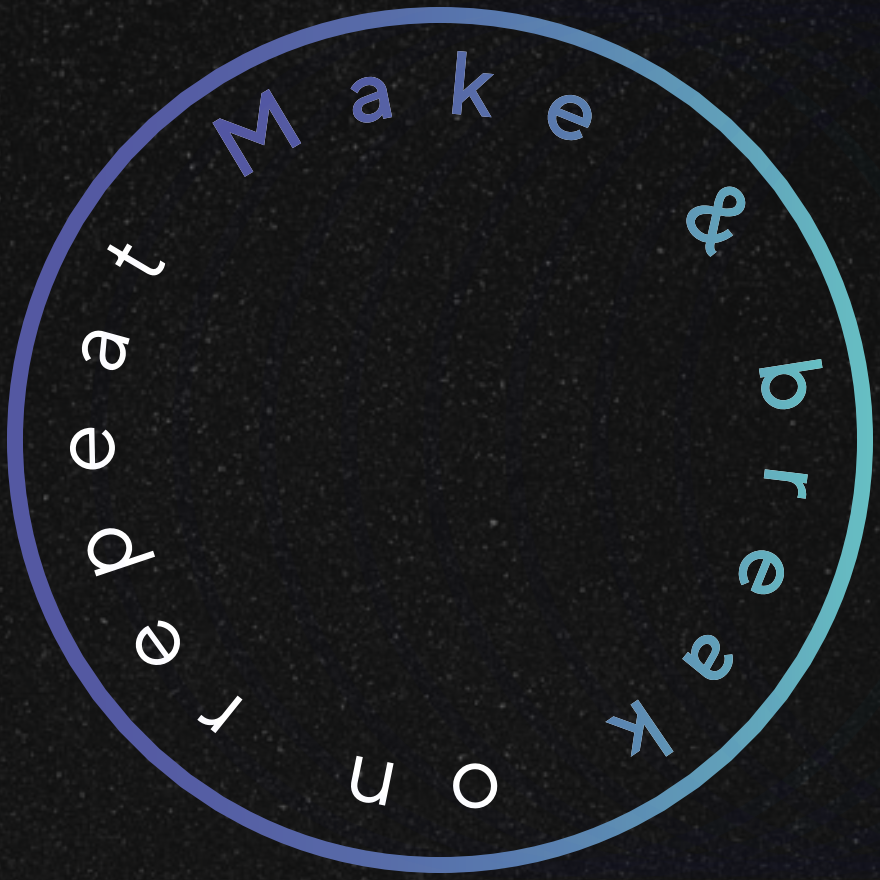
The TAIGER stripes is what makes us tick as technologists in a world driven by constant disruption and growth. With technology growing exponentially, TAIGER is committed to our mission to free the human intellect by unlocking a better way to work.

These stripes are the code we don't speak about. But act on. Live and breathe everyday. They are not given, but bred, earned and shared. They are the reasons why we attract clients who want to lead their pack. The shared values that attract talents from Fortune 500 companies. They are the core that keeps us centred as we move forward.

In short, it is a DISTINCTION from the rest.

MAKE BETTER

Finding a way to unlock next level efficiency, productivity and growth is what drives us at TAIGER. The work is never finished.

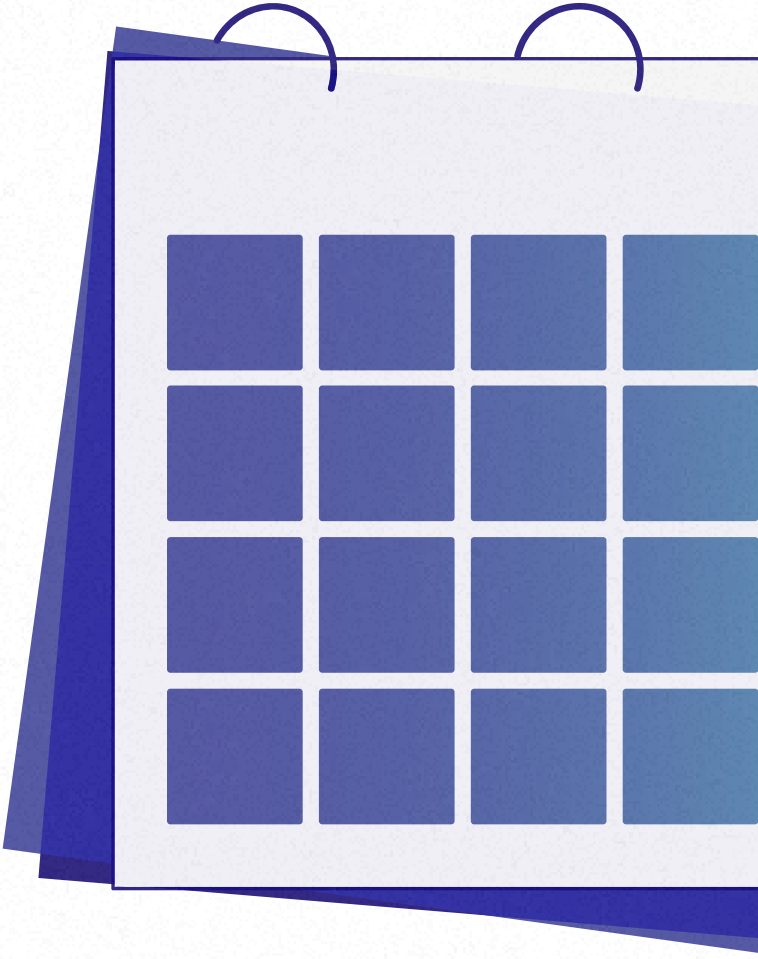


Make & break on repeat

Technological breakthroughs aren't pretty. They are often born out of long nights of trial and error and intense debates and iterations. Today, our technology is used to power global financial institutions and mission critical government agencies.

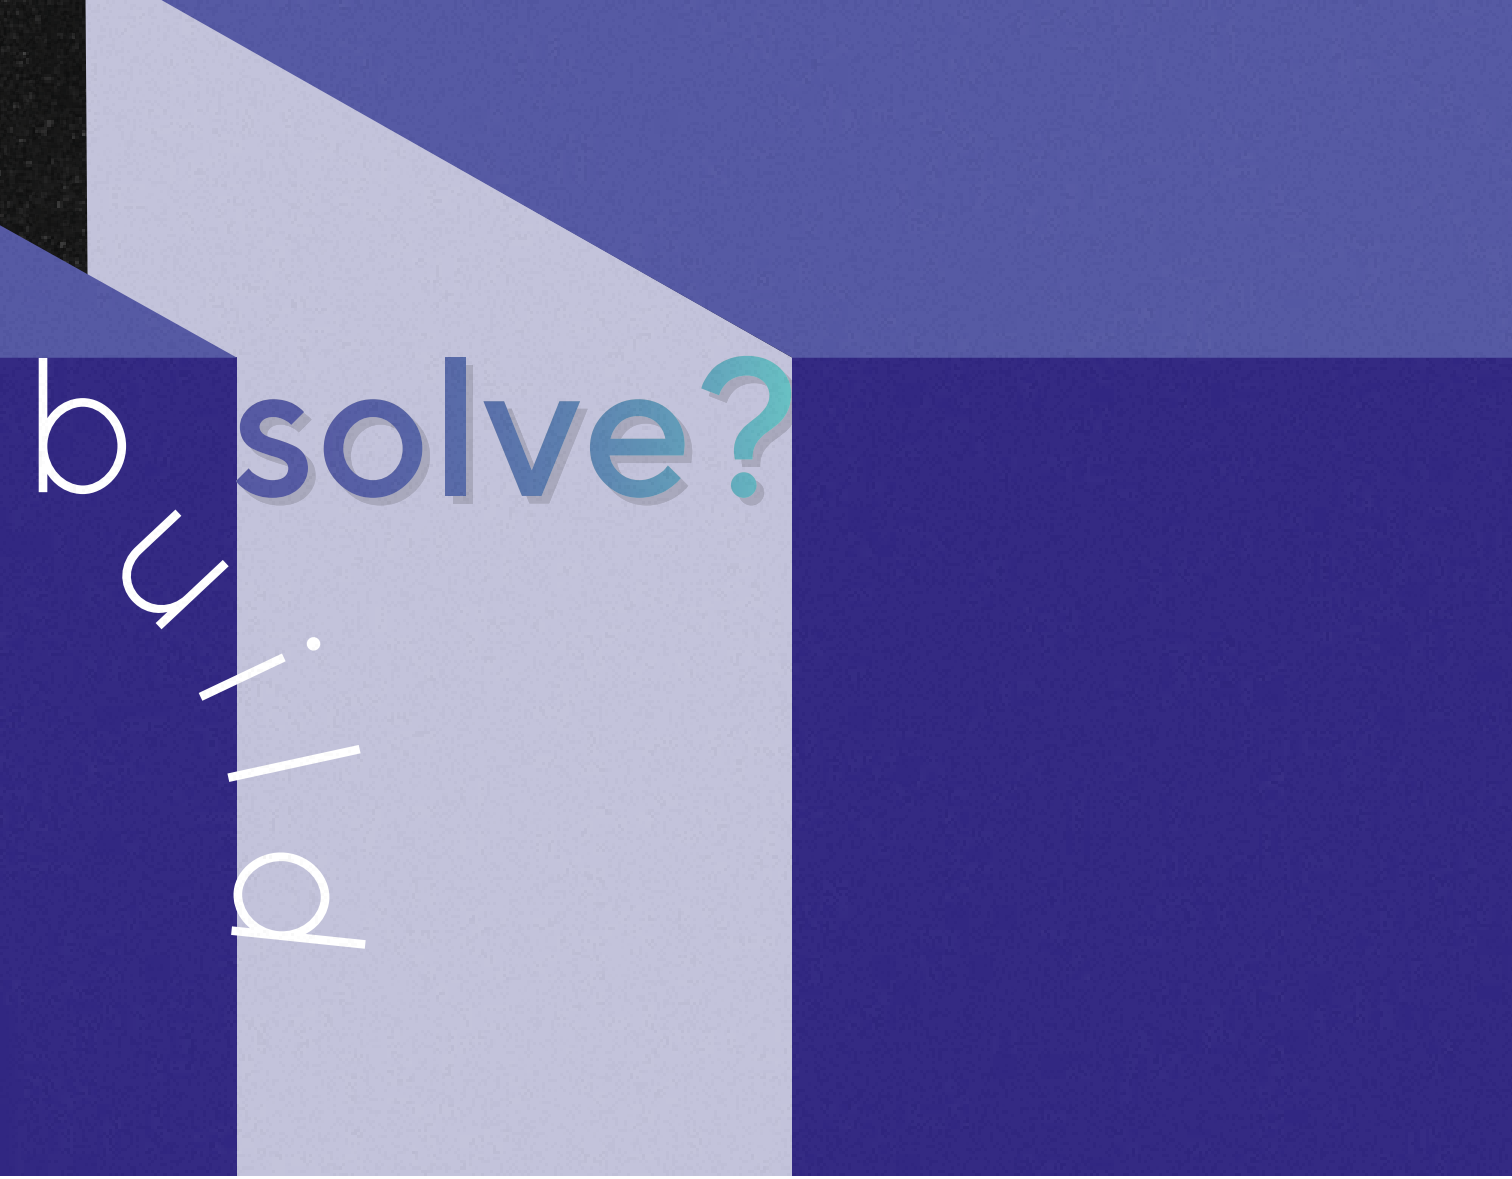
Build a life's work.

Not a work life.



The reason we attract top talents from big places is because we are committed not just in creating game changing work but life changing ones. Works that travel from LinkedIn profiles to TEDx stages.

What can we

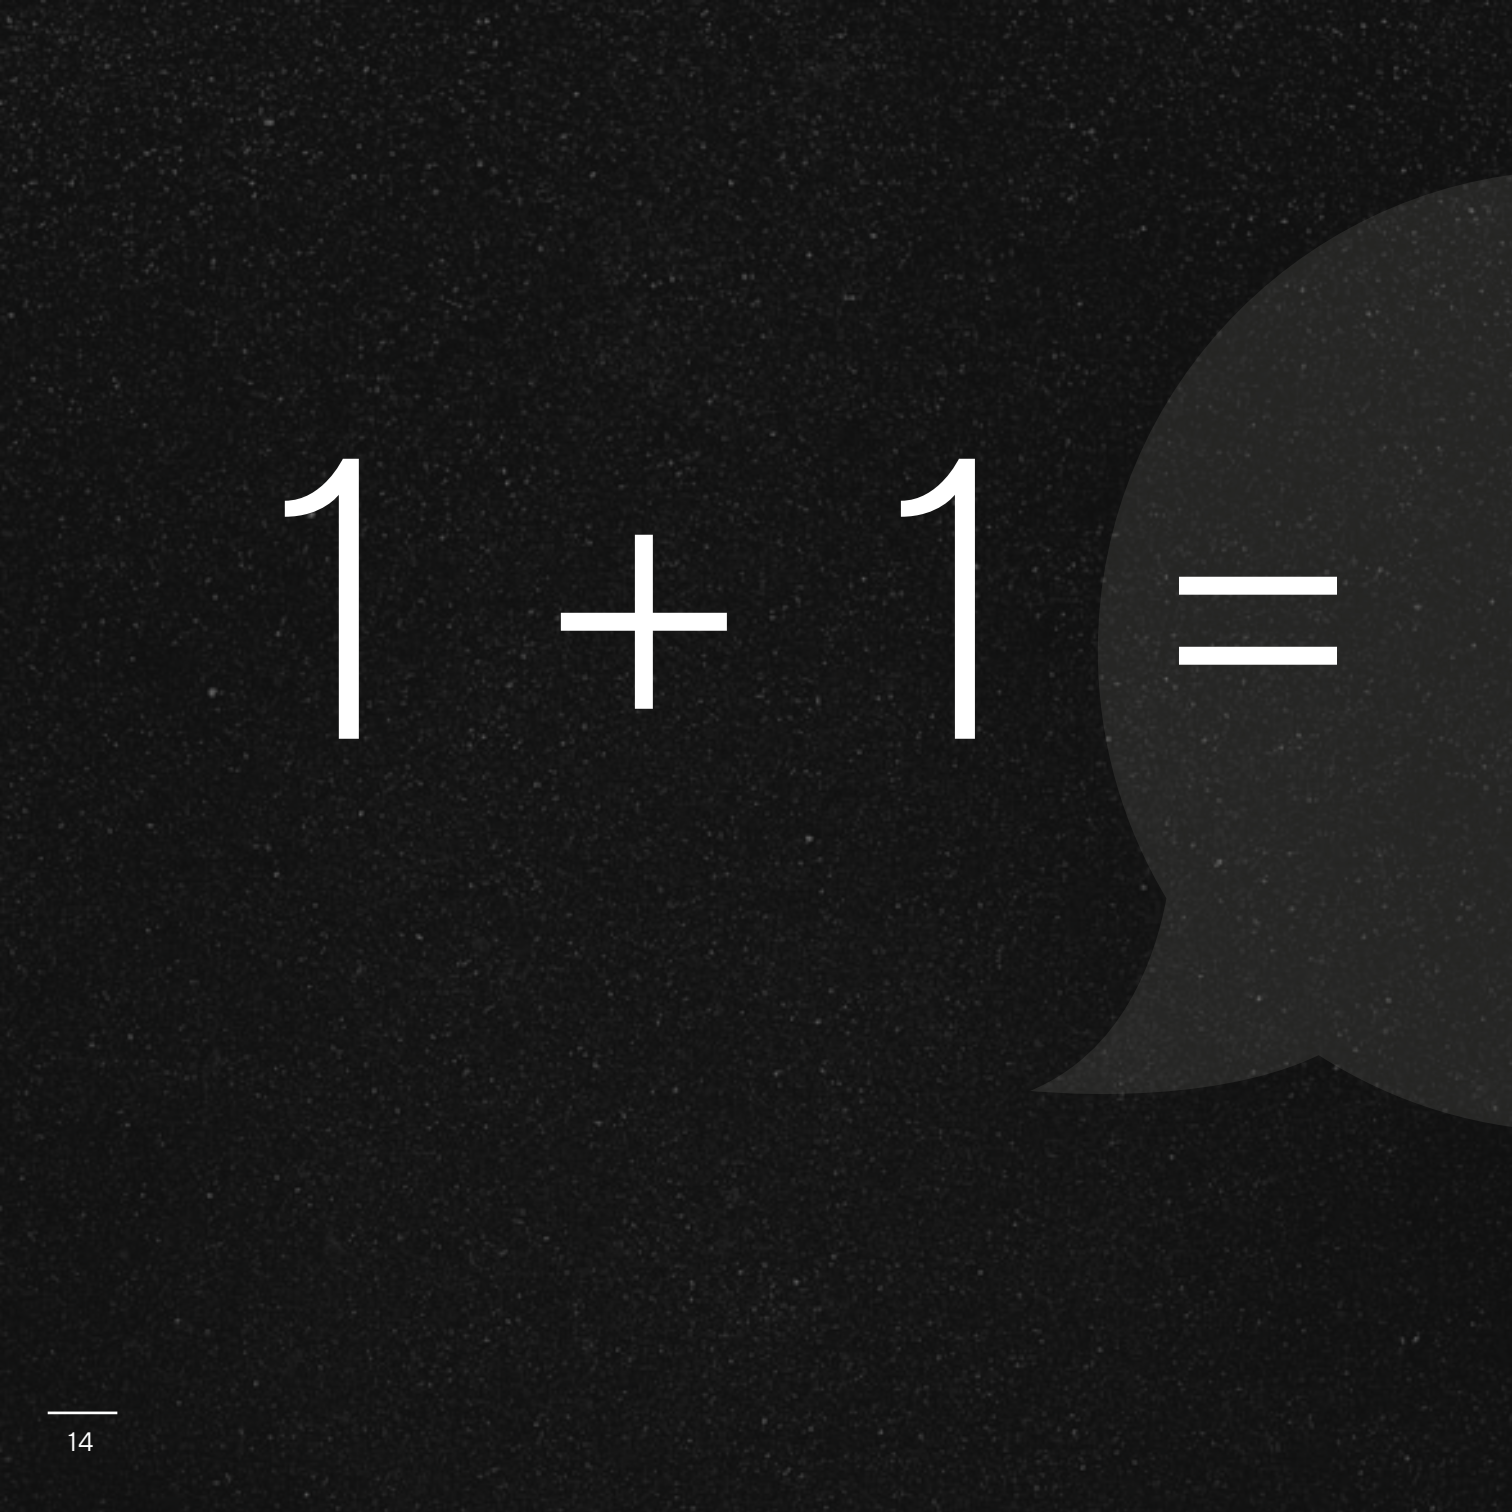


It's less about what we code but more about the value we deliver.

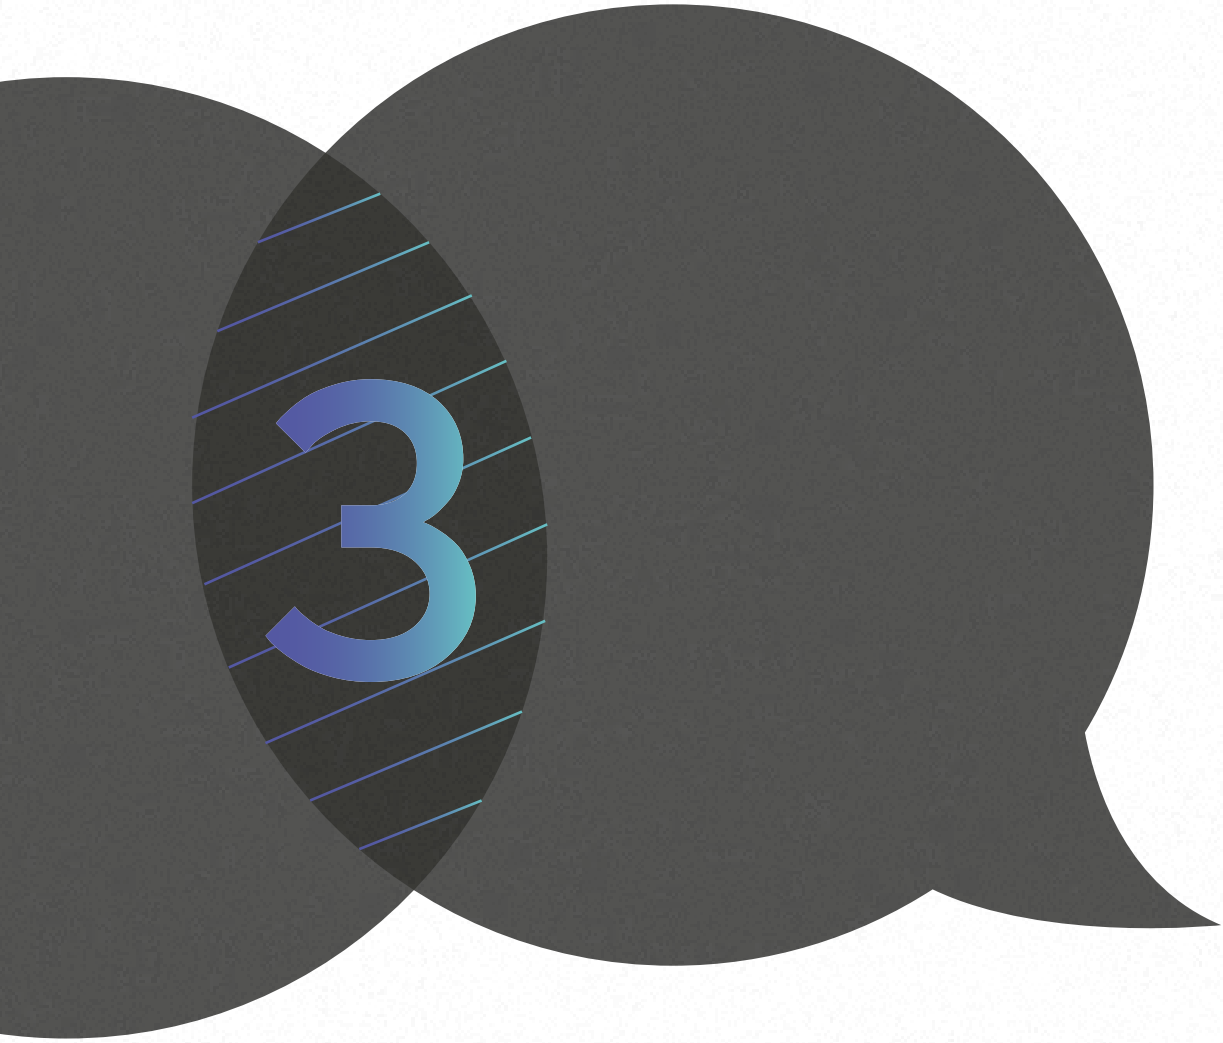
Jack of all trades

Master of ten.

The truth is, the world changes faster than we learn. That's why we are more than our degrees and PhDs. Rolling up our sleeves, picking up new skills and experimenting often are all traits that keep our edge sharp and our minds bright.



1 + 1 =



When minds meet, efforts are multiplied. Ideas build on each other and become better when we come together. What takes weeks to build elsewhere, can happen in days here.

THERE IS NO BOX

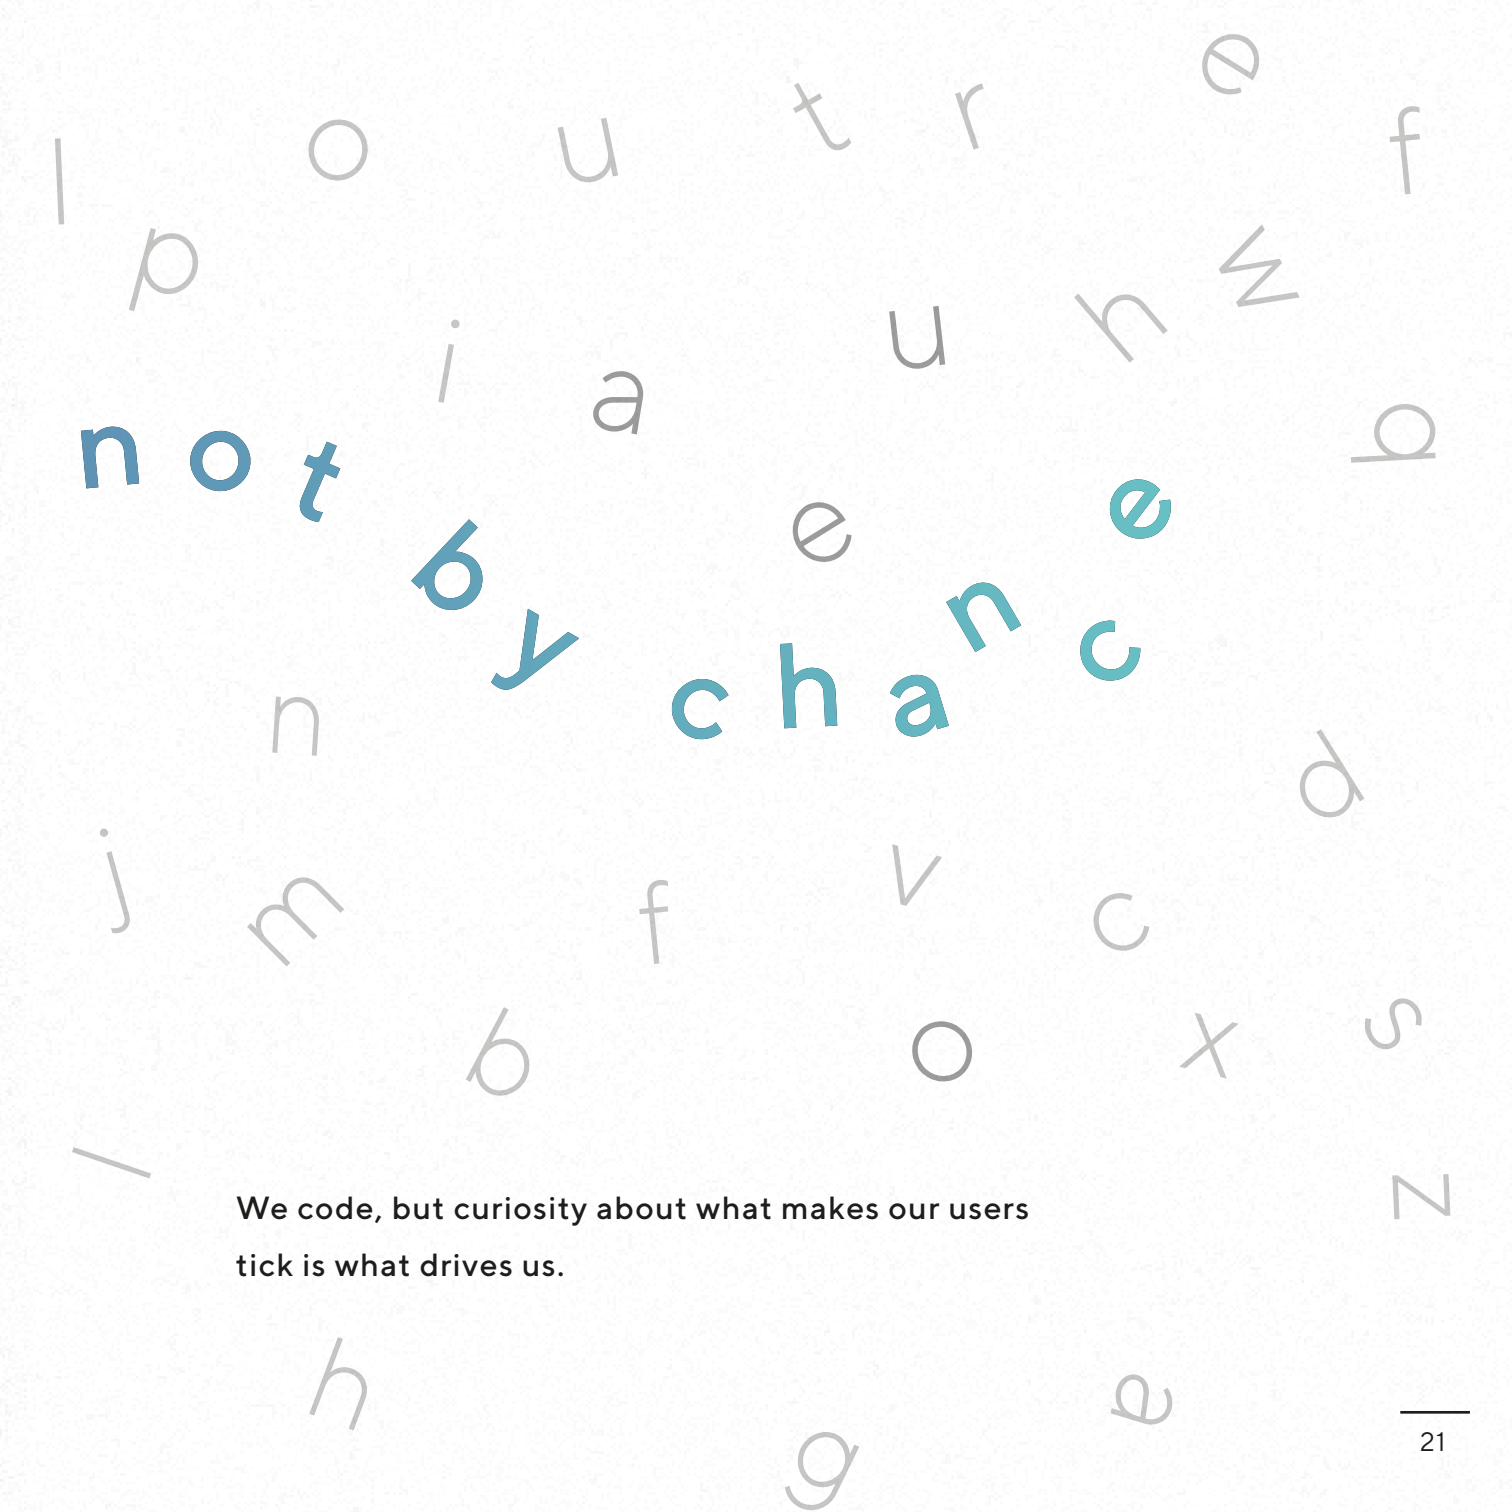
Engineering is creative and creativity is chaotic. Ideas don't come neatly packed in flowcharts and powerpoints. Draw on glass. Write on walls. Scribble on serviettes. Think out of the box often.

Do the right things in the

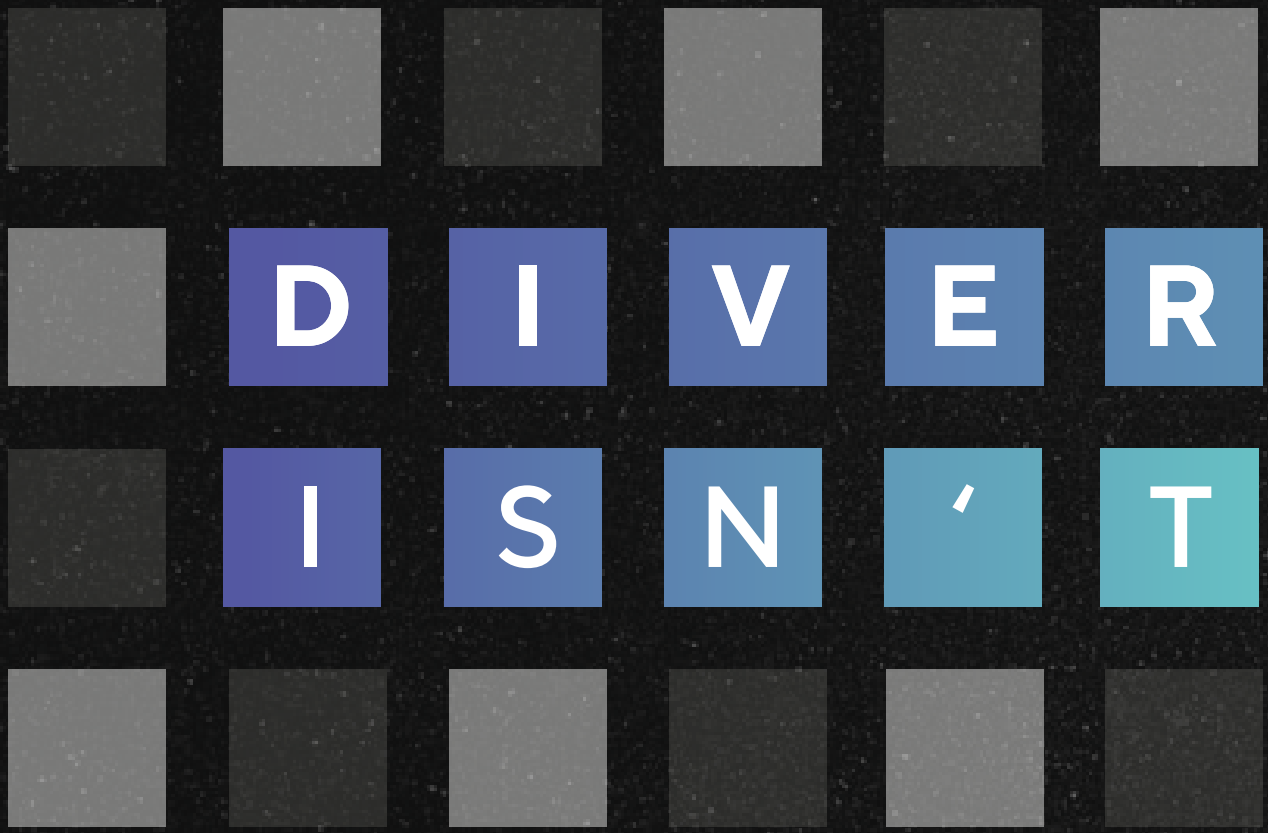
right ways

Purpose and professionalism goes hand in hand. That's why we are called upon by governments to advise on AI governance and ethics.

Journeys by craft.



We code, but curiosity about what makes our users tick is what drives us.



DIVER
ISN´T

No one is a token of anything. Each of us matters. We make a clear distinction that your voice comes not from your age but from your experiences – and everyone has a wealth of that to offer.
